Branch

- ☐ Headquarters
- ☐ Ruai
- ☐ Umoja

Date

PAR30 has risen sharply since mid-2025 — driven by a small number of large-balance loans, not a broad deterioration. Five loans (Moto Gari/Mjengo products, mostly Corporate/Religious Institution/SME borrowers) account for 77% of all delinquent balance as of Aug 2026. See Problem Drivers for the full breakdown

Recovery per Contact by Channel

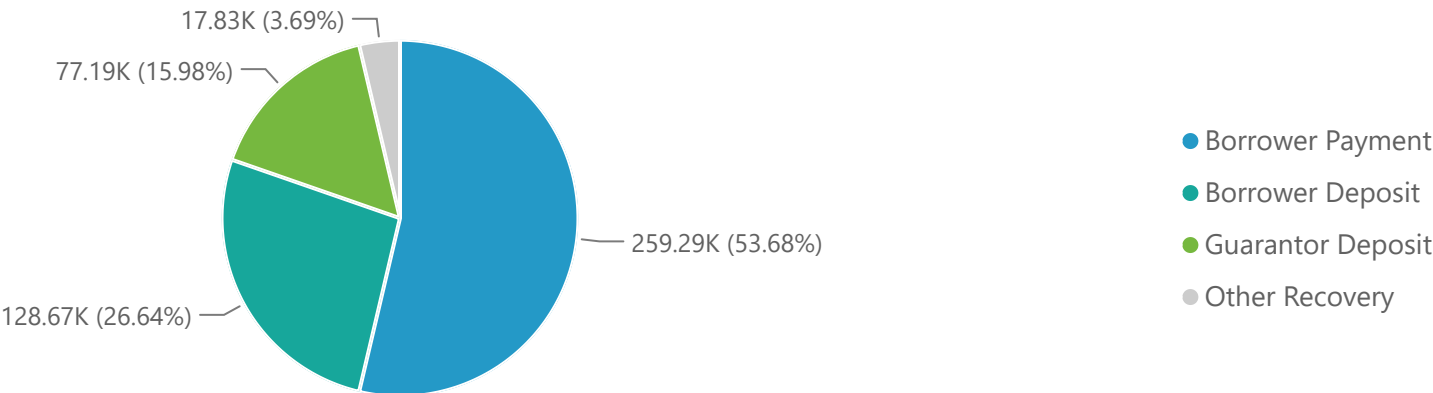

Contact To Payment Conversion

Two different measures: conversion shows how often a contact results in payment; recovery per contact shows the monetary recovery associated with collection activity.

Interpret small-channel results cautiously. Guarantor Contact (n=10) and Restructuring Offer (n=9) have limited observations in this synthetic dataset.
